Mathematical Statistics (Springer Texts in Statistics) Jun Shao

This graduate textbook covers topics in statistical theory essential for graduate students preparing for work on a Ph.D. degree in statistics. This new edition has been revised and updated and in this fourth printing, errors have been ironed out. The first chapter provides a quick overview of concepts and results in measure-theoretic probability theory that are useful in statistics. The second chapter introduces some fundamental concepts in statistical decision theory and inference. Subsequent chapters contain detailed studies on some important topics: unbiased estimation, parametric estimation, nonparametric estimation, hypothesis testing, and confidence sets. A large number of exercises in each chapter provide not only practice problems for students, but also many additional results.

From reader reviews:

Carlos Lauzon:

What do you with regards to book? It is not important with you? Or just adding material when you need something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question simply because just their can do that. It said that about publication. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need this specific Mathematical Statistics (Springer Texts in Statistics) to read.

Betty Freeman:

Reading can called brain hangout, why? Because while you are reading a book mainly book entitled Mathematical Statistics (Springer Texts in Statistics) your mind will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging just about every word written in a guide then become one application form conclusion and explanation that maybe you never get ahead of. The Mathematical Statistics (Springer Texts in Statistics) giving you yet another experience more than blown away your thoughts but also giving you useful info for your better life with this era. So now let us present to you the relaxing pattern is your body and mind are going to be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary shelling out spare time activity?

Denise Wallis:

Does one one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't judge book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer could be Mathematical Statistics (Springer Texts in Statistics) why because the great cover that make you consider about the content will not disappoint you. The inside or content is actually fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

Gloria White:

As we know that book is significant thing to add our knowledge for everything. By a publication we can know everything we would like. A book is a set of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This e-book Mathematical Statistics (Springer Texts in Statistics) was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a e-book. In the modern era like right now, many ways to get book that you wanted.
