Mathematical Structures for Computer Science

Judith L. Gersting

Mathematical Structures for Computer Science Judith L. Gersting
Computing Curricula 2001 (CC2001), a joint undertaking of the Institute for Electrical and Electronic Engineers/Computer Society (IEEE/CS) and the Association for Computing Machinery (ACM), identifies the essential material for an undergraduate degree in computer science.

This Sixth Edition of *Mathematical Structures for Computer Science* covers all the topics in the CC2001 suggested curriculum for a one-semester intensive discrete structures course, and virtually everything suggested for a two-semester version of a discrete structures course. Gersting's text binds together what otherwise appears to be a collection of disjointed topics by emphasizing the following themes:
• Importance of logical thinking
• Power of mathematical notation
• Usefulness of abstractions
