Analysis (Graduate Studies in Mathematics)

Elliott H. Lieb, Michael Loss

Analysis (Graduate Studies in Mathematics) Elliott H. Lieb, Michael Loss
Significantly revised and expanded, this new Second Edition provides readers at all levels---from beginning students to practicing analysts---with the basic concepts and standard tools necessary to solve problems of analysis, and how to apply these concepts to research in a variety of areas.

Authors Elliott Lieb and Michael Loss take you quickly from basic topics to methods that work successfully in mathematics and its applications. While omitting many usual typical textbook topics, Analysis includes all necessary definitions, proofs, explanations, examples, and exercises to bring the reader to an advanced level of understanding with a minimum of fuss, and, at the same time, doing so in a rigorous and pedagogical way. Many topics that are useful and important, but usually left to advanced monographs, are presented in Analysis, and these give the beginner a sense that the subject is alive and growing.

This new Second Edition incorporates numerous changes since the publication of the original 1997 edition and includes:

Features:

a new chapter on eigenvalues that covers the min-max principle, semi-classical approximation, coherent states, Lieb-Thirring inequalities, and more

extensive additions to chapters covering Sobolev Inequalities, including the Nash and Log Sobolev inequalities

new material on Measure and Integration

many new exercises

and much more ...

The Second Edition continues its no-nonsense approach to the topic that has made it one of the best selling books on the subject. It is an authoritative, straight-forward volume that readers---from the graduate student, to the professional mathematician, to the physicist or engineer using analytical methods---will find useful both as a reference and as a guide to real problem solving.

About the authors: Elliott Lieb is Professor of Mathematics and Physics at Princeton University and is a member of the US, Austrian, and Danish Academies of Science. He is also the recipient of several prizes including the 1988 AMS/SIAM Birkhoff Prize. Michael Loss is Professor of Mathematics at the Georgia Institute of Technology.

From reader reviews:

Ella Butler:

Book is actually written, printed, or descriptive for everything. You can understand everything you want by a book. Book has a different type. As you may know that book is important matter to bring us around the world. Next to that you can your reading talent was fluently. A guide Analysis (Graduate Studies in Mathematics) will make you to become smarter. You can feel much more confidence if you can know about anything. But some of you think that will open or reading the book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you seeking best book or appropriate book with you?

Irma Patterson:

Here thing why this Analysis (Graduate Studies in Mathematics) are different and reputable to be yours. First of all examining a book is good but it depends in the content of the usb ports which is the content is as tasty as food or not. Analysis (Graduate Studies in Mathematics) giving you information deeper and different ways, you can find any e-book out there but there is no publication that similar with Analysis (Graduate Studies in Mathematics). It gives you thrill studying journey, its open up your personal eyes about the thing this happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in recreation area, café, or even in your approach home by train. If you are having difficulties in bringing the branded book maybe the form of Analysis (Graduate Studies in Mathematics) in e-book can be your alternative.

Katherine Anderson:

This book untitled Analysis (Graduate Studies in Mathematics) to be one of several books that will best seller in this year, this is because when you read this guide you can get a lot of benefit upon it. You will easily to buy this specific book in the book retail outlet or you can order it through online. The publisher with this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Touch screen phone. So there is no reason for your requirements to past this reserve from your list.

Loretta Manson:

That book can make you to feel relax. This specific book Analysis (Graduate Studies in Mathematics) was vibrant and of course has pictures on there. As we know that book Analysis (Graduate Studies in Mathematics) has many kinds or type. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you and try to like reading that.
