350+ SMART Goals and Objectives for use with Children with Autism Spectrum Disorder

Chris de Feyter

350+ SMART Goals and Objectives for use with Children with Autism Spectrum Disorder Chris de Feyter
"350+ SMART Goals especially designed for use with Children with Autism".

Instead of going through *long lists* of hundreds of SMART Goals, Chris de Feyter has selected more than 350 SMART Goals he has used over and over with students with **Autism Spectrum Disorders**. Stop shooting in the dark, and select and use *carefully* **crafted** SMART Goals to get a child to succeed!

The 180 SMART Goals address learning needs in the following areas of development:

1. Social Competence (personal Management)
2. Transition
3. Communication
4. Motor Skills & Sensory

Most of the SMART Goals are written using the formula below. In some cases, a slightly different format was used:

"Time - Student - Support - Skill - Accuracy and Measurement, Documentation."

(Example) By June 2015, Student X will independently be able to choose a SMART Goal from this database 100% of time, as documented in the trial logs.

This collection of SMART Goals will help educators and home school parents **jump start** the creation of an Individual Education Plan or a Personal Program Plan. For students receiving Tier 2 interventions in a Response to Intervention Model, these goals can be used as Short-Term Objectives to guide educational programming.
