Vermont Agricultural Station

Bulletin - Vermont Agricultural Experiment Station Volume 197-218 Vermont Agricultural Station This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: ... in sufficient quantities and are active, nodules are formed, nitrogen is gathered, and, other conditions being favorable, the crop succeeds. Few farmers have really seen these nodules; but if a clover or alfalfa plant is with great care lifted out of the soil so that the root hairs are not torn off, they usually can be discovered; and they are worth looking at, for they are a great boon to agriculture. Now these bacteria are not always present in our New England soils, in view of the fact that alfalfa is not indigenous, particularly in the East. They often must be supplied; and the best means of doing this is by inoculation at the time of seeding. It cannot be urged too strongly that inoculation is absolutely essential to the successful production of alfalfa. It is best accomplished by scattering soil from a successful alfalfa field on the piece which is to be sown, or by using artificial cultures. INOCULATION BY SOIL TRANSFER Inoculation with soil from a successful alfalfa field will nearly always produce the desired results. Care must be taken to avoid the introduction of weed seeds or plant diseases. Since from 300 to 800 pounds per acre are needed, it is advisable to secure the soil from a nearby field. Surface soil through the root-filled area should be taken, spread out in a dark, or at least not sunlighted, place in not too thin a layer, and allowed to dry out. Seed and soil may be sown together or separately as is most convenient. A fertilizer drill may be used. In any event the soil should be harrowed in promptly for sunlight kills bacteria. Soil from around sweet clover (Melilotus alba) roots is quite as effective as an inoculant as is alfalfa soil. Sweet clover grows frequently along highways and in waste places in Vermont, especially in the Cha...
